

Update of Home automation over internet

ajay_bhargav, Fri Apr 20 2007, 01:42 pm

Home automation project is updated. There are few things added in the project. Here is the list of few updates..

- » LED Indicator added for indicating new message has received.
- » New command added to control the dimness of LED, this feature can also be used to control a FAN speed, can be used in any way.
- » Schematic updated
- » Power supply section updated, removed 12V supply because no more needed.

Hope you will like the newest updates... Don't forget to check it out in the downloade section. Happy Making Projects!!!
